

### ERYMANTHOS (2.224 m)

Natural border with Ileia's Region. The municipalities of Aroania, Tritaia, Kalavryta and Farres share its beautiful places. It is the native of the notorious wild boar, killed by Hercules.

In any case, this mountain has been a shelter to all victims during Turkish Occupancy and later on during Italian - German Occupancy...

It belongs to the geological zone of Olenos-Pindos and has got many water springs and valleys up to 1500 m. high.

The visitor can admire the beauty of the redish slopes and the forrests of fir (*Abies cephalonica*) that cover the greater part of the northern slope of the mountain at a height of 1.800 - 1.900 μ. The south slopes are also covered by fir and cypress forests (*Juniperus foetidissima*) at a height of 1.600 -1.700 μ. and over.
